DETAILED ACTION

The amendment filed August 16, 2005 and the remarks presented therewith have been carefully considered. However, they are not deemed to be fully persuasive.

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 10 and 11 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 5 of copending Application No. 10/914,004 in view of Gopfert. Claim 5 of application No. 10/914,004 recites substantially the same structural limitations as set forth in claims 10 and 11 of the instant application except that claim 5 of the ('004) application also include a plurality of rotatable compressible plates mounted to the plenum. However, it is well known in the art to provide a plurality of compressible plates around the perimeter of a suction cup array as shown in the Gopfert patent (see Figs. 4-10) to assist in the

Art Unit: 3652

positioning of the articles to be lifted. It would have been obvious to one of ordinary skill in the art to pivotally mount compressible plates around the suction cup assemblies set forth in claims 10 and 11 of the instant application as taught by Gopfert in order to compress together the articles to be handled.

This is a provisional obviousness-type double patenting rejection.

Allowable Subject Matter

3. Claims 1-9 are allowed.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
